FROM THE DIRECTOR'S DESK

*I am Karan Vasant Gaikwad.
At K Unit, I don't just teach dance
I engineer performers, I shape
leaders, and I construct
legacies."*

Dance, to me, is not merely entertainment. It is identity. It is character. It is power. This dossier is an invitation to collaborate with an institution that has defined Hip-Hop culture in Maharashtra for 20 years.

THE GENESIS: A 20-YEAR LEGACY

Pioneering the Culture: In 2004, I established the first structured training ground in Kolhapur, proving that world-class talent can emerge from any corner of the country.

Institutionalized Excellence: In 2010, we formalized K-Unit, becoming an ISO 9001: 2015 Certified Institution.

Global Mentorship: Over 5,000 students have been mentored under my direct supervision, many of whom are now industry leaders.

THE SCIENCE OF DANCE

At K-Unit, we train the mind before the body.
My pedagogy is built on three pillars of elite human development.

M

MENTAL STABILIZATION

We channel raw energy into absolute focus and cognitive concentration. Dance is our tool for mental clarity and psychological resilience.

P

PHYSICAL SCULPTING

We prioritize orthopedic safety, core strength, and high-performance endurance. Our dancers are trained with the intensity of elite athletes.

C

CHARACTER ENGINEERING

We instill the virtues of discipline, leadership, and social responsibility. A K-Unit performer is recognized by their conduct as much as their skill.

ACADEMIC FRAMEWORK

At K-Unit, we train the mind before the body.
My pedagogy is built on three pillars of elite human development.

LEVEL 1: FOUNDATION (INTELLECTUAL ROOT)

To understand the "Why" before the "How."

Curriculum: Hip-Hop history, cultural evolution, and fundamental groove mechanics. Mandatory Theory: Intellectual mastery is required before physical mastery.

LEVEL 2: INTERMEDIATE (TECHNICAL VERSATILITY)

Developing a diverse artistic vocabulary.

Styles: Breaking, Locking, Popping, and the energetic House culture.
Mastering the distinct elements of each style and technical flow.

LEVEL 3: ADVANCED (INDUSTRY SOVEREIGNTY)

Creating world-class artists for global stages.

Elite Study: Advanced musicality, body control science, and complex choreography structure. Preparing graduates for national shows and film industries.

TECHNICAL MASTER SYLLABUS

THE BASICS & LANGUAGE

Authentic Styles & Moves
Technical Theory & Global History
Vocabulary & Musicality
Poses & Rhythmic Response

THE SCIENCE & FLOW

Isolation, Tracing, Threads
Transition Mechanics
Head Flow & Unidentified Space
Groundwork and Layering

PERFORMANCE & POWER

Speed, Size, Dynamics
Underground Battle Psychology
Build-ups & Layers
Material Use & Freestyle Sessions

INDUSTRY PIPELINE

FILM & MEDIA SOLUTIONS

CINEMA READINESS

Dancers specifically trained for feature film choreography, precise camera movements, and cinematic casting requirements.

COMMERCIAL EXCELLENCE

Performers ready for high-budget music videos and premium brand shoots where visual impact is paramount.

REALITY TV DOMINANCE

Specialized training for competitive platforms like Dance Plus and Dance India Dance (DID).

GLOBAL MOBILITY

Talent prepared for international competitions, workshops, and global tours with professional etiquette.

STRATEGIC PARTNERSHIPS

I am actively seeking visionary collaborations for future projects that redefine the artistic landscape.

CREATIVE DIRECTION

Specialized Hip-Hop choreography for cinematic sequences and high-profile stage productions.

CASTING SOLUTIONS

Providing a troop of battle-ready, disciplined professional dancers for films and large-scale events.

INVESTOR OPPORTUNITIES

Ready for multi-city franchise expansion and the development of a global digital academy.

BRAND ALIGNMENT

Aligning the K-Unit lifestyle with high-end corporate brands and luxury merchandise collaborations.

MRI OF RIGHT KNEE JOINT

Multiplanar multi echo MRI of the right knee joint has been performed.

FINDINGS:

Large marginal osteophytes are noted across medial and lateral compartments of the knee joint as well as across the patello-femoral compartment. Evidence of minimal patchy thinning of articular cartilage is seen across medial compartment of knee joint. There is also moderate thinning of articular cartilage from medial facet of femoral trochlea. Severe loss of articular cartilage is seen from posterior aspect of weight bearing region of the lateral compartment of lateral knee joint with similar moderate thinning of articular cartilage from posterior surface of lateral femoral condyle associated with subcortical subarticular cystic changes in underlying bone. Minimal thinning of articular cartilage is seen from medial margin of the medial patellar facet. **these findings are consistent with changes of tricompartmental osteoarthritis involving right knee joint which are significantly advanced in the lateral compartment.**

Evidence of horizontal cleavage tear is noted involving posterior half of the body and posterior horn of the medial meniscus. There is another complex flap tear involving the junction of body and posterior horn of the medial meniscus with resultant meniscal fragmentation. The tear extends into the posterior root of the medial meniscus splitting it. There is minimal oedema involving the meniscal capsular junction of the posterior horn of medial meniscus.

Evidence of complex tear is noted involving posterior half of the body and posterior horn of the lateral meniscus with flap tears as well as oblique radial tears. There is severe fragmentation of the parenchyma of posterior horn of the lateral meniscus with severe attenuation and severe fraying of the residual meniscal parenchymal surface. There is separation of the posterior horn of the lateral meniscus from the lateral tibial plateau. There is suspected high grade tear involving its posterior root.

Evidence of high grade tear is noted involving midportion of the anterior cruciate ligament parenchyma with severe attenuation of residual anterior cruciate ligament parenchyma associated with significant laxity.

The posterior cruciate ligament appears intact.

The medial and lateral collateral ligaments appear intact.

The quadriceps tendon, ligamentum patella, medial and lateral patellar retinaculæ appear normal.

Moderate / mild right knee joint effusion noted.

The peritarticular soft tissues appear unremarkable.

ADVICE : Clinical correlation & further evaluation. Follow up imaging is recommended.

QUESTIONS

A CALL FOR SOLIDARITY

THE BATTLE OFF THE STAGE

Karan Gaikwad, the visionary who has shaped over 5,000 lives through dance, is currently facing a critical medical challenge. He requires an urgent **ACL + Meniscus Transplant** at Sahyadri Super Speciality Hospital, Pune, under the care of **Dr. Sachin Tapasvi**.

This complex procedure requires specialized **Meniscus and Cartilage implants imported from the USA**. The total cost of surgery, imported biological materials, and recovery is estimated at:

₹25,00,000

TOTAL ESTIMATED MEDICAL REQUIREMENT

COST BREAKDOWN

HOSPITAL & SURGERY CHARGES	~ ₹8,00,000
IMPORTED MENISCUS & CARTILAGE (USA)	~ ₹14,00,000
CUSTOMS & IMPORT DUTY (40%)	~ ₹3,00,000

HOW TO SUPPORT

YOUR CONTRIBUTION CAN HELP
THE LEGEND RETURN TO THE STAGE.
